

# NUVA

*Enhancing competitive advantage through effective team working*

# Introducing NUVA

*The intuitive natural team working environment*

*Collaborative working is essential in today's business world to ensure the rapid flow of ideas and understanding.*

*The traditional meeting is time-consuming and expensive, and is fast becoming environmentally unacceptable.*

*Thales Research & Technology (UK) Limited has developed a real alternative to this dilemma.*

*Welcome to NUVA - a new way of working!*

*NUVA provides a vertical space to promote natural and spontaneous communications. The horizontal desk allows users to share and edit documents with colleagues, in real-time.*

*Image © INMARSAT*

*BGAN (Broadband Global Area Network) connectivity ensures reliable, secure and easy to use mobile satellite communication, providing broadband data and video communications to the world's remotest locations.*

# NUVA

● **NUVA HUDDLE** provides a large digital tablet that enables a group of experts to work together at a central location.

● **NUVA INNOVATOR** provides a desk top version more suitable for hot desking and single-user interactions centrally or remotely.

● By reducing the need to travel, **NUVA** provides obvious economic savings, whilst helping to benefit the environment. It also has a social impact, improving the work-life balance for individuals, avoiding the need for unnecessary journeys and hence, improving productivity and cost saving.

**NUVA** differentiates from other desk top collaborative applications in terms of its professional design environment. It builds on our natural way of working. It combines high quality video and audio communications and allows live documents to be shared with multiple users to work together in real-time, irrespective of their geographic location. **NUVA** provides a natural and ideal means of working on multi disciplinary projects.

● Flexibility is key. The **NUVA** applications allow users to collaborate on most software documents, including three dimensional CAD. Collaboration occurs between the **NUVA HUDDLE**, the **NUVA INNOVATOR** or the standard laptop or tablet PC. Whether connected via a dial-up line, broadband, WiFi or by satellite, **NUVA** can link you securely with your colleagues.

*The nUVA technology is exclusively available through cereno.  
nUVA offers a unique, secure, reliable, functionally rich and easy  
to use solution whatever the size of your organisation. cereno provides  
a fully managed hosted service as a tax efficient lease option that  
eliminates the need for capital expenditure.*
